About

- I am an enthusiastic front-end developer who is proficient in HTML and CSS3, Javascript, bootstrap and React.js . I work with or without supervision and I'm really great in team work. I acquire knowledge through research and develop myself through projects . I'm tenacious about constant improvement in my skill set hence I spend half my day either learning or practicing what I've learnt in coding.

Experience

- **Freecodecamp**   September 2021 -
  Student
  I've been learning the art of web development using HTML and CSS3 and I've been able to carry out several projects which include responsive websites and basic functional web app
